

A Sure Way to Better Health

ProArgi-9 Plus is a revolutionary product that offers great taste, far-reaching health benefits, and powerful support for the cardiovascular system. With ProArgi-9 Plus, you're giving your body the support it needs for healthy functioning and long life.

Benefits of ProArgi-9 Plus

- ▶ Supports cardiovascular health
- ▶ Enhances blood flow to vital organs
- ▶ Combats the negative effects of premature cardiovascular aging
- ▶ Sweetened with Xylitol to enhance oral health
- ▶ Great-tasting citrus berry flavor
- ▶ Anti-aging benefits
- ▶ Supports healthy sexual performance
- ▶ May aid in decreasing body fat
- ▶ Maintains healthy blood sugar levels already in the normal range
- ▶ May boost energy levels

About Synergy

Synergy WorldWide is a division of Nature's Sunshine Products (NSP), a highly respected company in the herbal-health industry. The company is a debt-free industry giant. In 2002, *Nutritional*

Outlook magazine selected NSP as Supplement Manufacturer of the Year. Dun & Bradstreet and *Entrepreneur* magazine rated Synergy eighth in its "Hot 100 Fastest-Growing Businesses in the U.S."

Synergy WorldWide is a world leader in health, anti-aging, and wellness products. Visit us at www.synergyworldwide.com to learn more about ProArgi-9 Plus and its complementary V3 products Core Greens and Mistica.

The Next Wave of
L-arginine Technology

L-Arginine is one of the most potent nutraceuticals ever discovered. In addition to its beneficial effects on the cardiovascular system, l-arginine has been shown to have positive impacts on immune function, obesity concerns, human sexuality, and aging. As an adaptogen, l-arginine helps the body adapt to changes in life, the environment, and may increase stamina and sports performance.

In light of these findings, Synergy WorldWide is proud to introduce ProArgi-9 Plus, a remarkable product that contains l-arginine and other powerful ingredients that work in unison to enhance health, fitness, and longevity.

ProArgi-9 Plus was formulated in collaboration with leading l-arginine researchers such as J. Joseph Prendergast and other cardiovascular specialists who have conducted pioneering research in the proper application of l-arginine for cardiovascular support. ProArgi-9 Plus combines the latest technology and superior ingredients to help boost energy levels and enhance overall health.

Powerful Ingredients Work Together to Protect You

L-arginine

L-arginine is a vital amino acid that plays a role in a number of physiological functions in the body, but is best known for its cardiovascular benefits. In the body, l-arginine is converted to nitric oxide, which relaxes the blood vessels and regulates blood vessel tone and flexibility. This reduces stress on the heart, improves circulation, and lowers blood pressure.

Citrulline

The amino acid citrulline is metabolized to yield more l-arginine, which in turn provides additional nitric oxide. Citrulline helps to optimize blood flow throughout the body and promote healthy energy levels.

Folic Acid, Vitamins B₉ and B₁₂

These ingredients work together to naturally decrease homocysteine levels.

Red wine extract

This ingredient is high in antioxidants, anthocyanins, and polyphenols, which help protect the heart and reduce LDL oxidation.

Pomegranate

Pomegranate contains superior antioxidants, known as punicalagins and ellagic acid. Pomegranate inhibits LDL oxidation, supports arterial wall strength, and enhances the activity of eNOS, the enzyme responsible for converting l-arginine to nitric oxide.

Vitamin K₂

This vitamin keeps calcium in the bones and out of the arteries.

Vitamin D₃

This vitamin has long been known to aid in calcium absorption, but new research shows that D₃ also plays a role in healthy cardiovascular function and supports healthy inflammatory response.

Ribose

Ribose is a naturally occurring sugar that has been extensively studied for its ability to enhance the recovery of energy compounds in heart cells.

Xylitol

This ingredient is a low glycemic sweetener that occurs naturally in the body. Unlike other sweeteners, xylitol has been shown to promote saliva production providing protection against tooth decay.

"L-arginine is an amino acid that benefits the body in a myriad of ways. We are now learning more about how l-arginine helps the body release important hormones, increases lean muscle mass, and boosts the immune system. We can't ignore the power of l-arginine any more!"

—Dr. J. Joseph Prendergast
